Comments: The UAA was conducted in July, 2005 and no WBCR was observed at either of the two sites evaluated. The UAA evaluated WBCR based on natural pollutant sources and the hydrologic conditions of the river. The UAA did not contain sufficient information on natural concentrations of pollutants or on the hydrologic conditions of backwater areas. There is not enough information on the UAA criteria evaluated for the committee to make a recommendation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☐ Remove Use ☒ Inconclusive
